## Spain, China and Japan in Manila, 1571-1644

### *Local Comparisons and Global Connections*

This volume offers new perspectives on the connected histories of Spain, China and Japan as they emerged following the foundation of Manila as the capital of the Spanish Philippines in 1571. Cross-cultural encounters not only shaped Manila's development as a 'Eurasian' port city, but also had profound political, economic and social ramifications for the three pre-modern states involved. Integrating Manila into world history helps to revise many long-cherished misconceptions while replacing them with a more balanced view.
