

The Fourth Way

Nam, Kyung-Pil

(Governor of Gyeonggi Province, Republic of Korea)

'The Fourth Way' is a new economic and social development model comprised of AI, IoT, platforms, and more that is leading the fourth industrial revolution. 'The Fourth Way' is a model for realizing the vision of 'individual happiness' under the universal values of 'liberty' and 'social kindness'. 'The Fourth Way' aims to create a 'collaborative state' of national members through resource sharing (shared market economy), power sharing (consensus democracy) and risk sharing (cooperative communities). 'The Fourth Way' is proposed as the vision and policy for rebuilding Korea by the Governor of Gyeonggi Province, the largest provincial government in the Republic of Korea.
